Personal Statement

I have completed my Postgraduate Diploma in Information Science at Massey University. I am looking for a job or an internship in a company where my skills will make a difference and I can continue my professional development. I am a very fast learner, especially the knowledge and skills related to Software Engineering. I worked in China as a C++ developer for one year and a C# developer for two years, working on several commercial projects. Recently, I have been mainly engaged in some front-end languages, like AngularJS, jQuery, Javascripts. I have a methodical approach to coding and controlling project version.

Technology Matrix

Category	Technology/Tool/Practice	Experience	Rating(1-10)
.Net	C# with .Net Framework	2 years	8
	ASP.NET MVC 3 / 4	1 year	8
	SQL Server	2 years	7
	Visual Studio	3 years	8
Web	HTML5	1 year	8
	CSS3	1 year	8
	JQuery	1 year	6
	AngularJS	0.5 year	5
Linux	C++/C	2 years	7
	Android	0.5 year	6
Version Control Software	GitHub	2 years	7
	TFS	1 year	6

Education

College/School Name
September 2008 – July 2012 Shenyang Agriculture University (Bachelor Degree in Computer Science)
July 2016 – June 2017 (Postgraduate Diploma in Software Engineering with Distinction, Level 7)

Project Experience

Data analysis of the price of used cars using Python
(September 2016 – October 2016)

Project Description:

Independent python project. To predict the price of used cars in Auckland according to specific vehicle features, such as model, cc, year and kilometres.

Achievements and responsibilities:

The success rate of the prediction reached 90% in small samples and was successfully applied in selecting a cost-effective used car. The project incorporated data scraping, data integration, data wrangling, data visualization and data analysis and coding.

Financial Audit System
(February 2014 – January 2015)

Project Description:

The project involved developing an internal financial audit system, including the management of a large number of contract documents, the preview of audit reports and the classification of business processes.

Responsibilities:

Demand analysis, front-end and back-end module added and software maintenance.

Medical System
(August 2013 – January 2015)

Project Description:

The project involved developing a system for an American medical alliance to share records of the patients' daily drug use for doctors to carry out drug analysis and research.

Responsibilities:

Update and maintain the established website with C#, integrate the new platform into the original one.

Employment History

ASP.NET Developer, Longway Software Development Co.,Ltd, China
(August 2013 – August 2015)

I worked 24 months as a web developer with C#. My main job included:

- Writing both front-end and back-end code of a new module with jQuery and C#.
- Updating and maintaining the existing module and function.

C++ Developer, Tianjin Tiandy Digital Technology Co.,Ltd, China
(July 2012 – July 2013)

I worked as a C++ software engineer for one year. The main responsibilities included:

- Updating and maintaining existing Software Development Kit(SDK) with multithreading and socket technology.
- Developing the debugging software for automated testing of the camera circuit board.
- Providing technical support for customers on secondary development based on the SDK.
